DESCRIPTION

FOS 100 is a new compact self-contained LED bar designed for colouring large surfaces with a uniform projection, either indoor and outdoor.

FOS 100 can be used for many applications, such as: professional, for an ample range of special events; theatre and television, for uniform background colours and cycloramas; architectural, for lighting building facades, public and commercial spaces, monuments, etc.

FOS 100 is made on aluminium and steel offering high resistance to mechanical stress, with an IP65 protection rating.

FOS 100 length is 99 cm.

Various FOS 100 units can be easily connected together: the LEDs distribution pattern guarantees no black spaces between the LEDs of in-line bars, and an even coverage of lighted surfaces.

FOS 100 is available with or without a Z10 integrated power supply.

The Z10 power supply is available either with IP65 or IP20 protection rating.

Three dedicated lenses sets (Spot, Medium flood, Wide flood) are available for each model, offering different light beam projection angles.

FOS 100 SOLO can be controlled via any DMX lighting console.

FOS 100 range comprises various models, which employ different sets of LEDs tailored for distinct applications:

FOS 100+ FULL COLOUR (Full colour LEDs);

FOS 100 RGBA (Red + Green + Blue + Amber LEDs);

FOS 100 WHITE (White + Amber LEDs).

FOS 100+ FULL COLOUR and FOS 100+ SOLO FULL COLOUR

15 x 3W Full Colour LEDs • Integrated power supply (FOS 100+ SOLO FULL COLOUR)

FOS 100 RGBA and FOS 100 SOLO RGBA

48 x 1W RGB+Amber LEDs (12+12+12+12) • Integrated power supply (FOS 100 SOLO RGBA)

FOS 100 WHITE and FOS 100 SOLO WHITE

48 x 1W White+Amber LEDs (36+12) • Integrated power supply (FOS 100 SOLO WHITE)

FOS 100 TRIPLE SOLO

3 x FOS 100 + 3 x Z10 + 1 x TRIPLE BRACKET 100

All FOS 100 SOLO models are available with Z10 power supply IP65 or IP20 rated

All FOS 100 models are also available without integrated power supply

All FOS 100 models are also available with spot / medium flood / wide flood lenses

LED technology

FOS 100+/SOLO FULL COLOUR: 15 x 3W P5 II Full colour LEDs

16 million colours; linear colour temperature 3200°K ÷ 5500°K; 16 selectable types of White.

FOS 100/SOLO RGBA: 48 x 1W P4 LEDs (12 x Red, 12 x Green, 12 x Blue, 12 x Amber) 16 million colours; linear colour temperature 3200°K ÷ 5500°K; 16 selectable types of White.

FOS 100/SOLO WHITE: 48 x 1W P4 LEDs (36 x White, 12 x Amber); Linear colour temperature 3200°K ÷ 5500°K; 16 selectable types of White.

No infrared emission; no ultraviolet emission

LEDs average lifespan: 100.000 hours

Optical units

3 lenses sets available (Spot, Medium flood, Wide flood)

Control

Via any DMX lighting console

Protection

IP65 or IP20 (FOS 100 SOLO / FOS 100+ SOLO) protection level against the penetration of solids and liquids

Construction

FOS is made on aluminium and steel

Power supply

Integrated power supply (FOS 100 SOLO / FOS 100+ SOLO) / LED controller
(Z10 IP65 or Z10 IP20);

External dedicated (FOS 100) Z1, Z4 or Z8 power supplies / LED controllers

Connection

M12 connection system between Power supply and LED bar (All versions).

Powerconn + XLR connectors (FOS 100 SOLO IP20 / FOS 100+ SOLO IP20);

Harting connectors (FOS 100 SOLO IP65 / FOS 100+ SOLO IP65)

MAIN ELECTRICAL CHARACTERISTICS (FOS 100 SOLO / FOS 100+ SOLO)

Input Voltage Range : Vin 90 - 260 Vac
Frequency : 50 - 60 HZ
Power Consumption Range : 6 - 100 W
Power Factor (Pf) : 0.95 electronic PFC controller
Efficiency : 90% typical

Output:
Power Output Range : 4 channels output (RGBA) 1,5 - 25W per channel
Output Current : 350 mA @ 100% per channel (500mA @ 100% per channel in BOOST Mode)
Output Voltage : Vout 70V

Control Input:
Control Signal : DMX 512
Dimming System :Constant Current PWM
Address Range : DMX 512 channels addressable by display

ACCESSORIES
• Lenses set Spot available for each model
• Lenses set Medium flood available for each model
• Lenses set Wide flood available for each model
• 10XAWG26 multipolar black outdoor cable (Cod. 0509C061)
• M12 female (8 pole) cable connector (Cod. 0520P050)
• M12 male (8 pole) cable connector (Cod 0520P051)
• Z10 Outdoor (IP65) power supply / LED controller (grey) (Cod. 03.LA.020.IP65.26)
• Z10 Indoor (IP20) power supply / LED controller (grey) (Cod. 03.LA.020.26)
• Z1 power supply / LED controller (Cod. 03.LA.009)
• Z4 RACK power supply / LED controller (Cod. 03.LA.014)
• Z8 RACK power supply / LED controller (Cod. 03.LA.075)
• Z1 OUTDOOR power supply / LED controller (Cod. 03.LA.009.IP65)

IMPORTANT SAFETY INFORMATION

Fire prevention:

Never locate the fixture on any flammable surface.
Minimum distance from flammable materials: 10 cm
Replace any blown or damaged fuses only with those of identical value

Prevention from electric shock:

High voltage is present inside the unit.
Unplug the unit prior to performing any operation which involves touching the inside of the unit.
This equipment must be grounded, do not connect to non-grounded supplies.
The use of a thermal magnetic circuit breaker is recommended for each FOS 100 SOLO unit.
Use only AC supplies 90-260V, 50-60Hz FOS 100 SOLO IP20 model should never be located in position exposed to rain or in areas of extreme humidity.
A good air ventilation is essential for proper equipment work.

Safety:

The external surface of the unit may exeed 50°C; never handle the unit until at least 5 minutes have elapsed since the unit was turned off.
Never install the unit in an enclosed area lacking sufficient air flow.
The ambient temperature should not exeed 40°C and should not be lower than -10°C

For application where IP65 rating is not necessary, FOS 100 / 100+ cabling connection can be done with a standard UTP TIA/EIA 568-B2 category 5E cable.
The maximum distance between power supply and the unit should not exceed 100 meters.

For IP65 rating application, D.T.S. reccomed the use of a IP65/68 cable as the 10XAWG26 multipolar black outdoor cable (IP68) (D.T.S. Code: 0509C061).
The maximum distance between power supply and the unit should not exceed 100 meters.

DMX SIGNAL CONNECTION:

FOS 100 SOLO IP20 / FOS 100+ SOLO IP20

The unit operates using a digital DMX 512 signal. Connection between the controller and the unit or between units must be carried out using a two pair screened ⌀0.5 mm.
Ensure that the conductors do not touch each other. Do not connect the cable ground to the DMX connector chassis. The plug housing must be isolated. Connect the mixer signal to the DMX IN projector plug and connect it to the next projector by connecting the DMX OUT plug on the first unit to the DMX IN plug of the second one.
In this way, all the projectors are cascade connected.

P.S:
 If the display showing the DMX address flashes, then one of the following errors has occurred:
- DMX signal not present
- DMX reception problem

For Installations where long distance DMX cable connections are needed, we suggest to use a DMX terminator.
The DMX terminator is a male XLR 3-5 pins connector with a 120 ohm resistor Between pin 2 and 3.
The DMX terminator must be plugged into the last unit (DMX out panel connector) of the DMX line.

DMX ADDRESS

FOS 100+ SOLO FULL COLOR can be used in three different modes: 6 DMX channels, 9 DMX channels (default) or CUSTOM DMX channels.
FOS 100 SOLO RGBA and FOS 100 SOLO WHITE can be used in two different modes: 10 DMX channels (default) or CUSTOM DMX channels.

If you want to use the FOS 100+ SOLO FULL COLOUR in 6 channels mode, select the 6 CH mode from the MODE menu and set the following addresses on the mixer: **(To be used only with DTS Wall mounted DMX controller 0514L007)**

Projector 1	A001	If you want to select the next projector, just add "8"
Projector 2	A009	**DTS Wall mounted DMX controller 0514L007 assign 8 DMX**
Projector 3	A017	**channels per unit also if some channels are not used**
.....	A....	
projector 6	A041	

If you want to use the FOS 100+ SOLO FULL COLOUR in 9 channels mode, select the 9 CH mode from the MODE menu and set the following addresses on the mixer:

Projector 1	A001	
Projector 2	A010	If you want to select the next projector, just add "9"
Projector 3	A019	
.....	A....	
projector 6	A046	

If you want to use the FOS 100+ SOLO FULL COLOUR in CUSTOM DMX channels mode, select the CUSTOM mode from the MODE menu and set the parameters for Shutter, Dimmer, Red, Green, Blue, Ctc, Macro and Function to the desired DMX channels and confirm the settings with DONE

If you want to use the FOS 100 SOLO RGBA / WHITE in 10 channels mode, select the 10 CH mode from the MODE menu and set the following addresses on the mixer:

Projector 1	A001	
Projector 2	A011	If you want to select the next projector, just add "10"
Projector 3	A021	
.....	A....	
projector 6	A051	

If you want to use the FOS 100 SOLO RGBA / WHITE in CUSTOM DMX channels mode, select the CUSTOM mode from the MODE menu and set the parameters for Shutter, Dimmer, Red, Green, Blue, (White 1,White 2, White 3), Amber, Ctc, Macro and Function to the desired DMX channels and confirm the settings with DONE

Selecting the DMX address

1) Press the UP-DOWN key until you reach the required DMX address. The numbers on the display will start to flash (but the new DMX address hasn't yet been set).
2) Press ENTER to confirm your selection. The numbers on the display will stop flashing and the projector is now controlled by the new DMX address.

TIPS: if you keep pushed the UP or DOWN keys, the channels are calculated more quickly and you get a faster selection.

REC MODE
In DMX Recorder Mode,it is possible to create and store the scenes of the ChPr by using an external DMX controller.
The unit must be setted to 9 channels MODE

DMX Recorder Mode
For the programming of ChPr by using a DMX controller, besides the 9 channels necessary to control the unit a further 3 DMX channels are needed.
So that in RECORDER mode (via DMX) the unit will need 12 channels to be correctly programmed.
The three new DMX channels are:

DMX channel 10 = SCENES channel
From 0-10 = no function (r001)
From 11-255 are displayed the programmable scenes (max 16 scenes from M001 to M0016)

DMX channel 11 = EDIT channel:
-From 0-19 = no function
-From 20-234 the unit runs the configuration given by the received input DMX values.
With the channel SCENES it is possible to pass from one step to the next while with REC it is possible to record the selected scene.
-From 235-255 the unit runs the configuration given by the received input DMX values closing the sequence as last scene.
With the channel REC it is possible to record the selected scene as last scene.

DMX channel 12 = RECORDING channel
 Records the set scene with a variation between 0 to 255 (the display flashes indicating that the scene has been recorded).It is advised that you keep the REC channel set to 0 and to run through the 255 only once you have decided to save the scene. If ChPr is not closed, by indicating the last scene (Edit channel between 235-255), in playback mode all 16 scenes will be played through even if not programmed

REC MODE
In DMX Recorder Mode,it is possible to create and store the scenes of the ChPr by using an external DMX controller.
The unit must be setted to 10 channels MODE

DMX Recorder Mode
For the programming of ChPr by using a DMX controller, besides the 10 channels necessary to control the unit a further 3 DMX channels are needed.
So that in RECORDER mode (via DMX) the unit will need 13 channels to be correctly programmed.
The three new DMX channels are:

DMX channel 11 = SCENES channel
From 0-10 = no function (r001)
From 11-255 are displayed the programmable scenes (max 16 scenes from M001 to M0016)

DMX channel 12 = EDIT channel:
-From 0-19 = no function
-From 20-234 the unit runs the configuration given by the received input DMX values.
With the channel SCENES it is possible to pass from one step to the next while with REC it is possible to record the selected scene.
-From 235-255 the unit runs the configuration given by the received input DMX values closing the sequence as last scene.
With the channel REC it is possible to record the selected scene as last scene.

DMX channel 13 = RECORDING channel
Records the set scene with a variation between 0 to 255 (the display flashes indicating that the scene has been recorded).It is advised that you keep the REC channel set to 0 and to run through the 255 only once you have decided to save the scene. If ChPr is not closed, by indicating the last scene (Edit channel between 235-255), in playback mode all 16 scenes will be played through even if not programmed

AUTOMATIC OPERATION (AUTO):

FOS 100 SOLO / FOS 100+ SOLO can work in automatic mode without a DMX controller. First of all connect the projectors with a DMX cable (picture below). A maximum quantity of 32 slave units can be connected to the same Master unit.

MASTER   SLAVE 1   SLAVE 2   SLAVE 32

To activate Auto mode on the first unit, use the menu to run through the different modes until AUTO appears on the display, and press enter.
Now it is possible to choose between the different pre-programmed games (CUPr-RAIn-CU01/CU16-Wh01/Wh16) or ChPr which is user programmable through REC mode. To confirm game activation press ENTER on the selected GAME.

CUPr-RAIn-CU01/CU16-Wh01/Wh16

The first unit that will work as a Master should be placed in Automatic mode (AUTO), the other units have to be placed in 9 channels DMX mode (MODE 9CH) for FOS 100+ SOLO FULL COLOUR or in 10 channels DMX mode (MODE 10 CH) for FOS 100 SOLO RGBA / WHITE and the DMX address should be set at A001. For RaIn (rainbow) game it is possible to select the speed for the colour changhing (SPEE).
DIMMER function (in AUTOMATIC MODE) is active for all the programs.
SHUTTER function (in AUTOMATIC MODE) is active only for CU01/CU16 and Wh01/Wh16 macros.

ChPr MASTER/SLAVE

The first unit that will function as a Master must be set to Automatic mode (AUTO), the other units must be set to Slave mode (SLAV), selectable through the menu. In this way all the Slave units will be synchronised with the master and running their own ChPr game.
On the master unit it is possible to vary the Speed time (SPEE) for the colour changhing and the Wait time (UAIt) between the steps.
Speed time and Wait time on the Master, have priority on the slave units.
NB: It is possible to run GA.Pr on the other units even though these do not have GA.Pr programmed.
You can do this by setting the units to 9 ch DMX MODE for FOS 100+ SOLO FULL COLOUR or 10 channels DMX mode for FOS 100 SOLO RGBA / WHITE and selecting DMX address A001.

Rec mode

It is possible to program your own game on the FOS 100 SOLO / FOS 100+ SOLO that will then run it in AUTO mode (ChPr).
 Each unit can have its own programmed game.
In REC mode the unit must be set to 9 channels mode for FOS 100+ SOLO FULL COLOUR and 10 channels mode for FOS 100 SOLO RGBA / FOS 100 SOLO WHITE.
To program the ChPr by using a DMX controller, you need 3 more channels in addition to the 9/10 channels necessary to control the unit.
So that in RECORDER mode (via DMX) the unit will need 12/13 DMX channels to be correctly programmed.
The three new DMX channels are:

FOS 100+ SOLO FULL COLOUR
